SEE EXPLANATORY NOTES

EXPLANATORY NOTES

Market Value and Volume of Sales on Registered and Exempted Securities Exchanges

The data presented in this table are of two types depending upon the method of aggregation used by each exchange. Reports of those exchanges marked with an asterisk cover transactions cleared during the calendar month; clearances occur for the most part within five days of the execution of a trade. Reports for other exchanges cover transactions effected on trade dates falling within the report month. The variance introduced by these two different methods of aggregating the data is not considered to be significant and accordingly all registered exchanges are aggregated and reported in monthly summaries.

Stock data include voting trust certificates, certificates of deposit for stocks and American Depository Receipts for stocks.

Bond data have excluded transactions covering United States Government issues since March 1944.

Warrants data include trading in rights for all periods prior to January, 1972.

NOTE: SEE EXPLANATORY NOTES FOR OFFERINGS TABLES.

EXPLANATORY NOTES FOR OFFERINGS TABLES

1971 TO PRESENT 1/

The data included in the Commission's statistical series on securities offerings are a sample of the universe of all securities offered in the United States. This sample includes all primary security issues registered with the Commission for immediate cash sale to the public pursuant to the requirements of the Securities Act of 1933 or Regulation A of that Act. The sample also includes information collected by the Commission on certain private placements as described below. Excluded from the offerings data are all offerings not greater than \$100,000; all debt securities with terms of less than one year; all secondary offerings; all non-cash offerings; issues withdrawn after effective registration; issues not defined as securities under Section 2(1) of the Securities Act of 1933; offerings--both public and private--by issuers whose securities are exempted under Sections 3(a)(2)-3(a)(6) and Section 3(a)(11) of the Securities Act of 1933 2/; all employee stock plans; investment company issues other than closed-end shares 3/; intracorporate securities transactions; and sales to foreign purchasers.

The source of data for registered offerings is the registration statement filed with the Commission by the issuer of the securities. (Registration data and offering data are not directly comparable because, beyond the exclusions noted above, the registration date and the offering date may fall in two different monthly or yearly periods.) Data on private placements are collected by a Commission survey of 39 life insurance companies on a monthly basis and 9 more on a quarterly or semi-annual basis, and by reports of private placements filed on the Commission's Form 8-K. Life insurance companies surveyed by the Commission had assets on December 31, 1972, of \$190,145 million, or 79% of all life insurance company assets. Only those private placement commitments which are actually executed are included in the statistics. No representation is made that the private placement activity of the life insurance companies surveyed approximates private placement activity as a whole in the United States.

The offerings tables make a distinction between Corporate Offerings and Foreign Government Offerings. It should be noted that Corporate Offerings include issues by non-corporate business enterprises such as limited partnerships, and that the Foreign Government classification includes foreign government issues of all levels, foreign government agencies, and foreign government-owned enterprises.

553 - 189

The industry classification used in the offerings tables should be self-explanatory for the most part. It should be emphasized that the Communication group includes telephone utilities. In the period 1971-73, 98% of the dollar value of the registered issues in this category was accounted for by telephone utilities. The Commerical and Other industry group is comprised of agriculture, contruction, wholesale and retail trade, and all service activities other than financial services.

The security types used in the offerings tables are Bonds, Preferred Stock and Common Stock. The Bonds group includes convertible bonds, which are detailed on a special table. The Preferred Stock group includes convertible preferred stock; however, in the period 1971-73 registered convertible preferred stock accounted for less than 15% of the value of all registered preferred stock. The Common Stock category includes common shares issued by closed-end investment companies (preferred shares are included in Preferred Stock), as well as securities issued by non-corporate business such as certificates of participation and shares of beneficial interest, and other equity securities such as voting trust certifcates and certificates of deposit. American Depository Receipts are not included in the offerings statistics.

All figures are subject to revisions as new information becomes available which requires either an addition to or a correction to data previously published. Revised figures will be indicated with an "R".

1/ Explanatory notes applicable to the offerings data prior to 1971 may be found in Volume 33, pages 45 and 46, of the Statistical Bulletin. The major difference between the pre- and post-1971 data is that until 1971 the securities cited in footnote 2 were included in the offerings statistics.

2/ 3(a)(2) exempts domestic government issues and bank issues,
3(a)(3) exempts securities arising out of current transactions with
a maturity not exceeding 9 months,
3(a)(4) exempts securities issued by non-profit and/or charitable
groups,
3(a)(5) exempts issues by savings and loan associations,
3(a)(6) exempts issues by companies regulated by the ICC, and
3(a)(11) exempts intrastate offerings.

3/ No investment company shares are included for 1971 and 1972; closed-end investment company shares only are included for 1973. The Commission plans to revise the offerings data to include closed-end shares for the years 1971 and 1972, and when this project is completed, revised tables will be published in the Statistical Bulletin.

^{*} Dividend reinvestment plans initiated beginning January 1973.^{1/} Closed-end investment companies were included in extended cash sale until December 1972.

Closed-end shares include preferred and common stock.

^{2/} Includes mergers and consolidations subject to registration under 1933 Act, Rule 154, effective January 1973.

NOTE: See Explanatory Notes for Registrations

EXPLANATORY NOTES

Registrations

Data cover all registrations which became effective under the Securities Act of 1933 during the period covered. Issues are included as of the effective date, with the exception of those subject to post-effective amendment to report terms of offering. These are included as of the date of the post-effective amendment.

The classification primary corporate offerings refer to registered offerings for immediate cash sale where the proceeds of the offering are at the disposal of the issuing corporations. Secondary offerings are registrations of outstanding securities where the proceeds of the issue do not accrue to the issuing company. The dollar amount for both type offerings is based generally on the initial offering price. The classification unseasoned common stock includes initial offerings by companies registering common stock for the first time under the Securities Act of 1933, whereas seasoned common stock offerings are registrations by companies previously having securities registered under the 1933 Act. Other equity securities classification consists of offerings of certificates of participation or beneficial interests, warrants or options, voting trust certificates and other equity securities.

Issues to be offered for extended cash sale include investment company issues, and all offerings of employee savings and stock option plans. The classification foreign government is shown separately, whereas registrations by foreign corporations are included in with corporate offerings. Investment company securities include open-end, face-amount and unit trust offerings. Closed-end securities are included in primary corporate offerings.

Issues registered for other noncash purposes such as exchange transactions, securities given for property or services, or reserved for conversion are generally valued at the current market prices.

In order to eliminate double counting, the number of issues are shown for primary and secondary offerings only. However, effective registrations cover all cash offerings, noncash offerings, and offerings for extended cash sale.

Dollar amounts have been rounded and will not add to totals.

WORKING CAPITAL OF NONFINANCIAL U.S. CORPORATIONS
March 31, 1975

The net working capital of nonfinancial U.S. corporations decreased approximately \$1 billion in the first quarter of 1975; this was in contrast to increases of \$2 billion in the previous quarter and nearly \$8 billion a year earlier. Net working capital, which represents corporate investment in current assets in excess of current liabilities was approximately \$260 billion at the end of March, 1975.

Total current assets decreased nearly \$14 billion in the first quarter of 1975. Contributing to this sharp decline were reductions of approximately \$8 billion in accounts receivable and \$3 billion in inventories. This reduction in inventories was the largest quarterly decline since the beginning of this statistical series in 1944.

Also on the asset side, cash balances were reduced by almost \$2 billion, while holdings of U.S. Government securities were little changed from the fourth quarter of 1974. The ratio of these two items combined to total current liabilities--a frequently used measure of corporate liquidity--was .17 at the end of March 1975, unchanged from both the end of 1974 and a year earlier. Another measure of corporate liquidity, the current ratio (the ratio of total current assets to total current liabilities) was 1.59 at the close of the January-March period compared to 1.58 on December 31, 1974 and 1.60 a year earlier.

On the liabilities side of the balance sheet, the nearly \$13 billion decline in total current liabilities resulted from an abrupt reduction of \$16 billion in notes and accounts payable which apparently reflected a marked payoff of short-term bank loans. These declines were only partially offset by a \$5 billion rise in other current liabilities.

Besides the approximately \$1 billion reduction in corporate working capital in the first quarter of 1975, nonfinancial U.S. corporations invested about \$25 billion for additions to plant and equipment within the United States and nearly \$15 billion in other noncurrent assets including residential structures and fixed assets of foreign subsidiaries. To finance these long-term capital requirements, these corporations generated nearly \$22 billion from internal sources--depreciation and retained earnings--or approximately 56 percent of the required funds, unchanged from a year earlier. These corporations raised \$11 billion through net new securities financing--sales minus retirements--of which \$1.9 billion were from net new stock issues and \$9.5 billion from net sales of debt securities. The balance of the financing, approximately \$6 billion, was provided by long-term bank and mortgage loans and other miscellaneous sources.

Technical Notes

- 1) Year-end data for this series are based on Statistics of Income data through 1971, which cover virtually all corporations in the United States. Statistics of Income data may not be strictly compared from year to year because of changes in the tax laws, basis for filing returns, and processing the data for compilation purposes. All interim quarterly data and year-end estimates after 1971, are based on data compiled from many other sources, including data on corporations registered with this Commission.
- 2) The item, cash on hand and in banks, includes time certificates of deposit.
- 3) The item, U.S. Government securities, includes Federal agency issues.
- 4) Receivables from and payable to the U.S. Government do not include amounts offset against each other on corporations' books or amounts arising from subcontracting which are not directly due from or to the U.S. Government. Wherever possible, adjustments have been made to include U.S. Government advances offset against inventories on corporations' books.
- 5) The item, other current assets, includes marketable investments (other than Government securities and time certificates of deposits) as well as sundry current assets.
- 6) The current ratio is total current assets to total current liabilities.
- 7) The quick ratio is the summation of cash and U.S. Government securities of total current liabilities.
- 8) Figures are rounded and will not necessarily add to totals.

The accompanying table contains the revised aggregate estimates of current assets and current liabilities of nonfinancial U.S. corporations.

EXPLANATORY NOTES

Over-the-Counter Volume in Exchange Stocks

The volume of over-the-counter trading in exchange stocks (*sometimes referred to as the "third market"*) is based on reports received from broker-dealers pursuant to Rule 17a-9 of the Securities Exchange Act which became effective on January 4, 1965 and was revised on April 1, 1967.

Rule 17a-9 requires that broker-dealers who make over-the-counter markets in common stocks traded on the New York Stock Exchange report quarterly their total third market sales of such stocks in which they make markets. They are also required to report certain over-the-counter sales of such stocks in which they do not make markets, as defined in the Rule. In addition, other broker-dealers must report any third market sales which amount to \$25,000 or more if no other broker-dealer intervened in the transaction. The reporting system is designed to reflect all sales to (*or purchases by*) persons other than broker-dealers, excluding inter-dealer transactions. Over-the-counter volume shown in the tables, therefore, represents sales to individuals and institutions. Secondary distributions and other syndicated offerings are excluded.

Broker-dealers who make markets in New York Stock Exchange common stocks are required to show separately any over-the-counter purchases and sales which involve members of the New York Stock Exchange. These transactions are made pursuant to Rule 19b-1 of the Securities Exchange Act and New York Stock Exchange Rule 394(b) which both became effective November 7, 1966. These sales are included with total over-the-counter sales.

In comparing total third market sales with New York Stock Exchange volume, it should be noted that exchange volume includes preferred as well as common stocks and also includes sales to specialists and other exchange members as well as sales to the public. Member trading on the New York Stock Exchange generally amounts to about 25% of total trading. In comparing third market volume and exchange volume in any given stock, it should be noted in addition that third market volume includes odd-lot transactions whereas exchange volume for individual stocks, as reported by the New York, the Midwest and the Pacific Stock Exchanges, does not include odd lots.

The 50 New York Stock Exchange stocks for which third market volume is shown were selected on the basis of their continuing high activity in the third market. The list of stocks is subject to change from time to time.

EXPLANATORY NOTES

Revenue, Expense and Balance Sheet of New York Stock Exchange Member Firms Doing a Public Business

The revenue, expense and balance sheet data are received from NYSE member firms pursuant to Rule 416(b)(1) of the New York Stock Exchange which became effective January 1, 1972.

Revenue and expenses are reported on an unconsolidated basis and without adjustments to investment accounts for respondents' equity in profit or share of loss of affiliates or subsidiaries.

Securities Commissions

Commissions earned on all agency equity and debt transactions including principal transactions and net commissions earned on introduced accounts carried by other brokers and on omnibus accounts carried for other brokers.

Realized and Unrealized Gain (Loss) in Trading and Investments

Realized and unrealized gain (loss) from market making activities in securities held for sale in the ordinary course of business and not identified as held for investment. Dividends and interest income on securities in trading accounts are treated as an adjustment to gain (loss) and are not reduced by any allocation of Federal income taxes.

Profit (Loss) from Underwriting and Selling Groups

Gross profit (loss) from management of or participation in underwriting syndicates and selling groups is determined as the difference between proceeds of securities sold and their purchase price and allowances received from or given to other brokers. Any unrealized loss on securities unsold at the time the underwriting account was closed is considered as a deduction from the proceeds of securities sold.

Investment Company Securities Commissions

Income derived from sale of investment company securities as a retailer and as an underwriter.

Margin Interest

Interest on customers' securities and commodities accounts for financing customer margin debits.

Other Revenue not Related To The Securities Business

Miscellaneous other non-securities agency transactions for: variable annuities, placement of savings and loan accounts, fractional interest in oil, gas or other mineral rights, participation in real estate syndications.

All Other Revenue

Revenue from sources related and unrelated to the securities business not included in items listed above.

FORM 144 FILINGS FOR MONTH ENDED 06/30/75
